Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fastening means, i.e. hook and loop, snaps, etc., must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 3-5 and 13-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter

Art Unit: 3634

which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The hook, clip and snap have not been adequately disclosed and a specific structure thereof is not inherent.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,9-11,19 and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Coons.

See shade 21.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5,7,8,13-15,17and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coons.

The manner in which the shade is fastened to the monitor by way of engaging the covers 16a,16b, is clearly an obvious design choice. Snaps, hooks, adhesives and

Art Unit: 3634

clips are all well known attachment means and it would have been obvious to use these due to their inherent advantages.

Claims 2,6,12 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coons in view of Salansky.

Salansky discloses the use of hook and loop fasteners or adhesive, column 5, lines 5-13, for attaching computer accessories to the computer monitor. In view of this teaching, it would have been obvious to use such fasteners to attach the cover 21 of Coons to the monitor, either directly or through further attachment to covers 16a,16b.
